Message from the Principal:

Parents,

As the Middle and High School Principal here at Fairland, it pleases me to report to you that data recently made available to us for the state testing year of 2015-16 shows very positive results for Fairland students.

The percent of Fairland High School students that scored proficient or above on their End of Instruction tests exceeded the percentage of all other students statewide in five of the seven tests administered at different grade levels. Results of Oklahoma's Core Curriculum Tests, taken by Fairland Middle School students were equally as impressive. Students there scored proficient or above on four of the five tests given.

The purpose of the state testing process, although currently in transition, is to provide feedback to all stakeholders as to the quality of education our students are receiving. It is important to understand that each year brings its own set of challenges and obstacles that can have a definite impact on student success, and each year, different students are required to take different tests. It is also important to understand that student success does not happen overnight.

Be confident in the fact that it is the goal of everyone within the Fairland School District to overcome those challenges in order to provide each student with a quality education that prepares them properly for college and career. We welcome and appreciate your support.

Sincerely

Jerry Johnson
Fairland MS/HS Principal
